MANAGEMENT RESPONSIBILITY

QUALITY POLICY

To deliver products and services to Clients with contract requirements on time and free of defects.

The Project Quality Plan is binding on all Urbano company staff and all the subcontractors in carrying out their duties.

ORGANIZATION

Activities related to Quality, responsibilities and authority of personnel performing should be identified and documented.

QUALITY ASSURANCE & CONTROL ENGINEER

He is vested with the authority required to ensure Client satisfaction. His interventions and decisions can be overruled only by QA Manager.

Responsible for preparation of project specific quality manuals. ITPs procedures. and method statements.

Responsible for recognition of Quality Problems. He is also responsible for taking initiative to solve recognized problems and for verifying implementation of corrective actions at the construction site.

Coordinates with the Client's representative to witness all the operations specified by Client in the Inspection and Test Plan and obtain approval on the test reports.

METHOD STATEMENT

Urbano Doors & Windows 's scope of work in a certain project will be carried out as follows:

When the signed contract document is handed over to the sales, Urbano Doors & Windows will assign an experienced and qualified Project Manager:

MANAGEMENT RESPONSIBILITY

PREPARATION & ENGINEERING WORKS

The major engineering works such as shop drawings, typical details, structural calculations, material submittals, material index list and fabrication drawings will be prepared by our technical, as per **Urbano Doors & Windows** and as per the international systems standards.

01 Shop Drawings:

The first step of preparation works is to check the tender drawings for any modifications and issue the concept designs architectural drawings and the related schedule, showing the elevation, vertical section, horizontal section, location & specifications of each item. In parallel, and with close coordination with the project manager, meetings might be arranged with the main contractor and consultant to discuss the project details and requirements. Accordingly, shop drawings and section details are prepared for each particular item of the scope. The issued drawings are checked by the team leader, the technical manager and the project manager, then submitted for approval. Submittals are prepared as per **Urbano Doors & Windows** procedures and forms to maintain proper filing and record. After finalizing the modifications process as per the consultant's requirements, a full set of drawings is issued for construction, and several copies are distributed as per the project conditions.

02 Material Index List:

Material index list is prepared after receiving the consultant's comments and/or approvals on the submitted shop drawings. The material index list includes all material references and quantities, such as aluminum profiles, gaskets, accessories, sealants.... As well as the draft glass list which will be followed by the exact cutting sizes after checking the built sizes on site.

MANAGEMENT RESPONSIBILITY

03 Material Submittal:

Samples and data sheets for all the used aluminum or Upvc systems and the related glass and accessories are submitted for approval. Submittals are prepared as per **Urbano Doors & Windows** procedures and forms to maintain proper filing and record.

04 Execution Schedule:

Execution schedule is prepared in coordination with the main contractor, and submitted to the consultant for approval.

05 Procurement:

The materials of the project are ordered according to the material index list. Orders may be issued in several batches according to the progress on site and the related execution schedule.

06 Site Visit and Mobilization:

In parallel to the above, the site Project Engineer/Supervisor pay consecutive visits to site to observe the existing conditions, arrange for mobilization and office setup and prepare the adequate logistic procedures for the works to be executed properly. A detailed method statement will be prepared for particular applications of sophisticated items.

07 Site Survey & Measurement:

After site readiness, all site opening are surveyed and measured. Accordingly, cutting lists are issued to be implemented in fabrication drawings and glass order.

MANAGEMENT RESPONSIBILITY

FABRICATION, INSTALLATION & HANDLING OVER

01 Profile Protection:

All aluminum & Upvc profiles are protected by high quality protection tape, in order to avoid any damage to the coating during fabrication, transportation and installation processes. Protection is applied by special machines or manually.

02 Fabrication:

The fabrication process will take place in Urbano Doors & Windows by our highly experienced Technicians (5 to 20 years of experience), supervised by our trained and experienced Foramen. The overall process is inspected by our QA/QC engineers, from fabrication to dispatch, in accordance with Urbano Doors & Windows's QA/QC standards.

03 Delivery to Site:

When the site is ready for frame installation, the frames will be transported to site and stored in the storage area provided by the Main Contractor. All Gaskets and Accessories are carefully stored in their original packing in order to avoid any kind of damages (scratches, moisture, humidity)

04 Installation

Once the finishing works are in progress, and The site is clean, the installation of frames can start. The installation process is carried out by professional technicians, supervised by highly experienced supervisors. Once the frame installation is in progress, they will start the glass installation in parallel.
